

Empowering Digital Transformation Through Data & AI

Unlocking Business Value at Unprecedented Speed

About Us

DataInfa is a global data and AI company, founded in 2020, built on over a century of combined enterprise expertise. It works with large organizations to bring structure, governance, and reliability to complex data environments, enabling data to be consistently trusted and used at scale. With a presence across key global markets, DataInfa is positioned at the intersection of data, decision-making, and enterprise transformation.

Services

Professional Services & Consulting

Expert-led data engineering, governance, and AI-driven data management solutions tailored to your enterprise needs

Cloud Modernization

Seamless migration and modernization of data ecosystems for scalable, high-performance cloud architecture

Product Expertise

Specialized implementation, integration, and optimization of Informatica, Microsoft, Databricks, Snowflake and more

Business Analysis & Advisory Consulting

Strategic data advisory to optimize architecture, drive efficiency, and maximize business value

Pre-Sales Consulting

Technical and strategic pre-sales expertise to ensure the right data solutions from day one

Experts in Data Management Solutions Implementation

Precision-driven execution for robust, future-ready data management infrastructures

Application Managed, Migration Services & Support

Comprehensive support and proactive optimization for mission-critical data applications

Enterprise Data & AI - Strategy & Implementation

End-to-end AI and data strategy execution-bridging Innovation with enterprise scalability

Full stack AI development

Custom, end-to-end AI engineering—from data pipeline design and model training to seamless production deployment.

GCC as Service

Elevate your enterprise with a custom-built GCC that fuses cost efficiency, innovation, and operational excellence. From talent and technology to delivery and governance—we create intelligent, future ready centers that drive real business impact
